Aspenwood Dental Associates and Colorado Dental Implant Center offers **Teeth in a Day**, an alternative to traditional dental implants [2] that will deliver excellent results for replacing missing teeth. At your initial consultation, our Denver implant dentists [3] will perform a thorough examination to determine whether Teeth in a Day is the best option for you.

**Why Replace Missing Teeth?**

If left untreated, your missing teeth can lead to serious health issues. Some of the consequences caused by missing teeth include:

- Adjacent teeth may shift to fill in the gap, resulting in bite issues
- Your jawbone may shrink, affecting your appearance
- You may experience additional bone loss and a greater likelihood of gum disease [4]

**Your Teeth in a Day Procedure**

Our Denver implant dentists will use 3-D digital imaging technology to develop an ideal treatment plan for you dental implants. Implants will be placed to support your new prosthetic teeth, whether they are single crowns, bridges, or full arch replacements. When you leave our office, you will be able to enjoy the benefits of your new teeth.

If you need to replace an entire arch of teeth, our dentists may recommend the All-on-Four implant procedure [5] or one of the many other options for full arch replacement.
